### MCPc Adds to Wireless Mobility Solutions Team, Enhances WIFI Offerings

**CLEVELAND** — MCPc, Inc., a Cleveland-based technology products and solutions provider, has announced the hiring of key personnel to enhance the organization's wireless mobility solution (WIFI) offerings, with an emphasis on voice and radio frequency identification (RFID). MCPc welcomes Bill Cannon, Kevin Cannon, Richard Lindhe, Mark Keider, Joe Metzger and Bob Lapmarado, all formerly of NeTeam.

The new hires will lead strategic efforts in offering wireless mobility solutions for customers nationwide, particularly those in the healthcare, legal and government and education industries. The team's strong reputation for providing innovative solutions, that promote both efficiency and safety through the use of locator devices and related products, advances MCPc's ability to meet customer needs in this critical area.

"The addition of the NeTeam members strengthens MCPc's level of experience in voice over wireless solutions and reinforces our position as one of the country's top comprehensive technology solutions providers," said Mike Trebilcock, Chairman and CEO of MCPc. "Finding talented people who fit so well into your business model, and share your passion for both the industry and customer care, is one of every business' greatest challenges. With this team we believe we have more than met that challenge."

"We are thrilled to have joined forces and look forward to being a single, trusted advisor for all of our customers' technology needs," Trebilcock added.

MCPc currently maintains hundreds of certifications from leading industry manufacturers, and has strategic partnerships with companies such as Cisco, HP, Munson Electronics and Air Magnet. In addition, MCPc is certified to service and support the technology recommended for customers to solve their business complexities.

"With the management structure, processes and respect MCPc has in the community to support us, we couldn't be better positioned to help our customers succeed in the years ahead," said Bill Cannon.

### About MCPc

MCPc is a trusted technology products and solutions provider that helps reduce the complexity associated with technology selection, purchasing and deployment, helping its customers maximize IT investments. Headquartered in Cleveland, Ohio, MCPc serves more than 7,000 customers from 27 locations across the country and represents more than 100,000 products.

From the core datacenter and network infrastructure to the end users hardware and software requirements, MCPc ensures the total solution with a strong focus on helping customers reduce costs and increase revenue. For more information, visit [www.MCPc.com](http://www.MCPc.com).
