MCPc Launches New Website

CLEVELAND — MCPc announces the launch of its new website www.mcpc.com. After months of research and development, this new website provides a comprehensive view of MCPc and its technology solutions and expertise. The content is fresh and relevant and incorporates new social media representation designed to provide innovative ideas and alternatives for IT executives as well as a forum for our audiences to connect and share their knowledge.

“The launch of our new site is just the beginning of a larger strategy aimed at helping our customers both increase revenue and reduce cost. This is the foundation for MCPc’s growth in 2010 and beyond. The multiple testimonials provided on the site demonstrate our capabilities to our customers and the benefits they have realized through working with us,” said Michael Trebilcock, Chairman and CEO of MCPc.

MCPc will use our website to spotlight our technology products and solutions and strengthen our communications with our various audiences. It will improve our position as a trusted advisor for technology solutions ranging from Unified Communications to Telepresence to Datacenter Solutions. We will continue to create and load new content including case studies, podcasts and videos to encourage our customers to check back often for information. MCPc’s strategic vision is one of delivering complete end-to-end technology solutions. By linking people, processes and technology, we help decrease cost, increase efficiency and improve revenue.

About MCPc

MCPc is a trusted technology products and solutions provider that helps reduce the complexity associated with technology selection, purchasing and deployment, helping its customers maximize IT investments. Headquartered in Cleveland, Ohio, MCPc serves more than 7,000 customers from 27 locations across the country and represents more than 100,000 products.

From the core datacenter and network infrastructure to the end users hardware and software requirements, MCPc ensures the total solution with a strong focus on helping customers reduce costs and increase revenue. For more information, visit www.MCPc.com.
