MCPc Receives NorthCoast99 Award for 2010

CLEVELAND — MCPc, Inc., a Cleveland-based [technology products and solutions provider](#), announced today that it has been named a NorthCoast99 Award recipient for the second consecutive year. Developed and presented by [ERC](#), the [Northcoast99](#) is a recognition program that honors 99 great workplaces for top talent in Northeast Ohio each year. MCPc won this distinction based on its performance in several categories, including: organizational innovation, success and performance, staffing and workforce planning, and development and training, amongst others.

“There are so many companies in Northeast Ohio doing wonderful things to make their workplace cultures friendly, productive, healthy and fun,” said Mike Trebilcock, Chairman and CEO. “We are truly honored to be included with them again, and are committed to continuing to improve the programs that make MCPc one of the top workplaces in the area. Our associates have what it takes to give MCPc a competitive advantage in the marketplace, and we look forward to converting that into our future success.”

“Congratulations to all of this year’s winners for leading by example,” said ERC President, Pat Perry. “NorthCoast99 organizations have re-defined the Northeast Ohio workplace in good and tough times. They have crafted a strategy and put initiatives in place designed to compete locally, nationally and globally through top-performer attraction and retention. This strategy is smart and in the long run will pay incredible dividends.”

Since 1999, hundreds of organizations have been nominated and applied for the NorthCoast99 award, and the program has recognized nearly 400 organizations for their ability to maintain great workplaces that support the attraction, retention and motivation of top performers.

About MCPc

MCPc is a trusted technology products and solutions provider that helps reduce the complexity associated with technology selection, purchasing and deployment, helping its customers maximize IT investments.
