

THE DATA PROTECTION COMPANY

Introducing

Cart-as-a-Service

Medical carts, aka Workstations on Wheels, are essential for quality patient care. They are expensive to buy, difficult to manage, and challenging to keep current. **MCPc solves for this.**

Cart-as-a-Service is a truly comprehensive, phased, and affordable way to solve your cart challenges:

Eliminate the capital expense of replacing and upgrading your cart fleet.

Detailed reporting to improve fleet management.

Dramatically simplify and reduce the costs of integration, deployment, and support of your carts.

Optional Asset Management Program for carts, compute devices, monitors, and badge readers.

Preventative maintenance program.

Impactful Benefits – all for only one low monthly fee per cart.

Scalability

Our “as a service” delivery model enables you to add carts quickly and easily.

Greater Budget Predictability

Fixed, monthly pay-as-you-go pricing provides cost certainty, simplifying budgeting and forecasting, freeing up capital, positively impacting cash flow, and aiding strategic planning.

Cost and Time Effectiveness

Cart-as-a-Service moves your costs from CAPEX to OPEX, leaving you more cash in the bank to spend on growing your business.

Focus on Your Core Competencies

There is no need to set up internal programs or conduct training for employees; consequently, they can concentrate on their direct duties and achieve better performance. Leave the support and management to us.

Lower Operating Costs

Cart-as-a-Service removes much of the heavy housekeeping burden, enabling internal resource to be either streamlined or redeployed. Analysts estimate that adoption of a Cart-as-a-Service strategy can secure savings of 30-50% over a four-year timeframe.

The High Quality of Services

Professional maintenance and a scheduled refresh cycle provides you with the latest updates and all the emerging technologies, guaranteeing the highest quality of services.

Better Customer Experience

Newer carts and technologies with better uptime leads to greater staff productivity, better patient satisfaction, and happier employees.

How it Works:

1. Select a Manufacturer: Altus, Capsa, Ergotron, Jaco

2. Custom Configure the Cart to Meet Your Needs

MCPc and the Manufacturer will consult with you and your clinical team on the cart configuration that best suits your needs.

3. Add Your Technology Standard Config includes:

- Select your Standard Compute Device:
Thin Client, Tiny PC, All in One, or Laptop
- Select your Monitor:
Size, Medical Grade, Privacy Screen, Touch, etc.
- Select your Medical Grade Keyboard and Mouse
- Select Optional Accessories:
 - Tap Badge Reader
 - Barcode Scanner
 - Barcode Printer

4. Integration Services and Logistics

MCPc will provide the following services:

- Build the carts
- Integrate the technology
- Provide all the cable management
- Charge the cart
- Test the cart and its functionality at our integration center
- Deliver the cart ready to go
- No need for storage onsite in your facilities
- Your resources can focus on your clients and allow MCPc to do this non-standard work

5. On-Demand Delivery

We can do on demand delivery to meet your rollout schedules with devices ready to be used.

6. Support Services

MCPc provides support services for the life of the Cart-as-a-Service contract. We will pick up the broken carts weekly replacing them with a ready to use cart, freeing up precious space. This eliminates the need for your team to be trained on repairs, freeing up space onsite at your facilities, and improving uptime for your users.

7. End of Life Services

Once the cart and its devices have reached their end of life, on the pre-determined contract, MCPc will perform the end-of-life services on the EOL cart and the technology on the cart to help determine the replacement upgrade for your next state of the art solution for your health system.

MCPc Cart Repair Services

Hassle-Free Maintenance and Support Services for your existing cart fleet no matter the brand. Flexible service and support options to meet your needs.

Incident Response Based Program

- Similar to Cart-as-a-Service Program.
- MCPc will pick up broken carts on weekly run and replace them with working repaired carts from the previous weeks.
- This frees up precious space in your hospital and frees up your employees' time to work on more strategic projects for your health system.
- Incident Based Program provides a predictable budgeted activity for your health system.

Onsite Repairs Program

- MCPc will send a technician onsite to your facility weekly to assess your broken carts. The technician will return the following week with the parts from the previous week, repair those carts, and assess the broken carts from this week.

Cart Hospice Program

- When your carts and their devices are at the end of their life, MCPc will sustainably recycle them with a 100% data destruction and 0% landfill commitment. We will also help you determine the best replacement technology.
