

MULTI-FACTOR DECONTAMINATION

UV-C

HEAT

VHP

WIPES

**LAPTOPS / DESKTOPS / TABLETS / PHONES
KEYBOARDS / CABLES / ACCESSORIES**

With the upcoming return of your remote employees and their devices to the workplace, there is a heightened awareness around infection control and asset management. MCPc offers several practical solutions and a frictionless 360° logistics program to make this effort appealing operationally and financially.

UV-C

Ultraviolet light in its most potent form inactivates any exposed organic cells. Used primarily in freshwater purification, in food-grade production facilities, and select medical applications, UVC is 99%+ effective at eliminating pathogens without damaging chemicals or leftover residue.

VHP

Vaporized Hydrogen Peroxide is a dry aerosol sterilant registered with the EPA as a substance that destroys or eliminates all forms of microbial life in the inanimate environment, including all forms of vegetative bacteria, bacterial spores, fungi, fungal spores, and viruses.

HEAT

Zero % humidity heating chamber can reach temperatures up to 170F which is enough to kill bugs, and inactivate pathogens, bacteria, and viral contamination.

WIPES

Chemical wipes can be effective at decontaminating hard surfaces and high contact areas. Due to chemical makeup, this is recommended as an effective temporary solution for IT equipment, damage or delamination may occur with heavy use on select surfaces.

MCPc's Decontamination Facility: **SKYPARK: CLEVELAND**

Service Specs

High volume (1000+) device roll-out or refresh, contained & accurate chain-of-custody process, asset management data collection.

Please contact MCPc, or your Ingram Micro representative for a quote

Mobile Decontamination Unit: **20' CONTAINER**

Service Specs

On-site decontamination unit providing high per-cycle capacity, fully-staffed with operator & asset recovery analyst, best as a temporary solution to relieve device hygiene concerns.

Please contact MCPc, or your Ingram Micro representative for a quote

Mobile Decon Unit on Wheels: **6'x3' CABINET**

Service Specs

Mobile unit designed for ease of use and configurability, self-service control panel, adjustable capacity per 25 minute cycle, best for ongoing device hygiene and regular decontamination needs.
